**STEP**

**1**

Determine the best mounting orientation for your camera

(To avoid blocking your battery compartment or computer connector port, the Camdapter Adapter has been designed to be mounted in one of two directions - see Figure 1-A.)

Figure 1.

**STEP**

**2**

Reattach the CoolStrap to the adapter using the split ring (see Figure 2-A) and tighten the adapter to the camera (see Figure 2-B).

(Remember, in a pinch, a coin can be used as a screw driver!)

Figure 2.

**STEP**

**3**

The CoolStrap can be used two ways - at the palm of your hand for greater control (Figure 3), or at the wrist for more flexibility (Figure 4). The strap length can be adjusted for either use. Once you've found the strap length that works for you, secure it in place with the lock-dot (see step 4).

The CoolStrap has a unique strap locking feature. Once you've found the comfortable strap length for your hand or wrist use, just slide the strap lock dot tight against the split-ring to secure the fit (Figure 5). To loosen, slide the dot back toward the strap (Figure 6).
